## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Wildfeuer (6298055).

As per claims 1,7,14,19,20, Wildfeuer (6298055) teaches:

“transmitting audio over a network.....audio packets are stored in a jitter buffer.....jitter buffer latency.....modified during periods of quasi-silence....types of audio, non-speech audio or speech audio comprising” as voice encoding/decoding over a

Art Unit: 2654

data network minimizing latency times by detecting speech or non-speech (col. 2 lines 7-22 and lines 43-58)

“a non-speech detection module....audio” as detecting a real or false dtmf (col. 6 lines 15-32)

“an add header.....data packet” as data packets (Fig. 4) with headers (col. 3 lines 57-67)

“a remove header routine.....enabled” as removing fixed delay’s and changing the delay based on a voice/speech determination or a dtmf determination (col. 4 lines 40-55)

As per claims 2,8,15, Wildfeuer (6298055) teaches one bit notification (figs. 5 and 6)

As per claims 3,9,16, Wildfeuer (6298055) teaches RTP (col. 8 lines 19-25)

As per claims 4&5,10,11,17,18, Wildfeuer (6298055) teaches identifying states based on speech or dtmf detection (col. 6 line 50 – col. 7 line 29)

As per claims 6,12,13, Wildfeuer (6298055) teaches buffer latency disablement (col. 2 lines 44-50)

***Response to Arguments***

3. Applicant's arguments filed 5/30/2002 have been fully considered but they are not persuasive. With respect to applicant's arguments pertaining to Wildfeuer not teaching a non-speech identifier, examiner argues that Wildfeuer teaches storage of the DTMF symbol, which is a "non-speech identifier", as claimed. As per applicant's arguments that Wildfeuer does not teach enablement of the modification of the jitter buffer latency, examiner argues that Wildfeuer teaches the modification of jitter buffer latency to remedy the jitter problem (col. 6 lines 1-32).

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
